1 Introduction

Verona Solar LLC (Verona Solar) plans to apply to construct a major electric generating facility to be known as the “Verona Solar Project”, under Article 10 of the Public Service Law (PSL) in Oneida County, New York. Pursuant to the rules of the New York State Board on Electric Generation Siting and the Environment (Siting Board), applicants proposing to apply to construct a major electric generating facility under Article 10 must submit a Public Involvement Program (PIP) Plan. The PIP must be submitted to the Department of Public Service (DPS) for review at least 150 days prior to filing a Preliminary Scoping Statement (PSS). This document is the PIP plan for the Verona Solar Project (the Project or the Facility), a solar energy facility described in Section 3.

As required by 16 NYCRR § 1000.4, this PIP describes the steps Verona Solar plans to take to inform, engage, and solicit input from the local community, general public, and other stakeholders. Stakeholder concerns, interests, local knowledge, and recommendations will be evaluated, addressed and considered by the Applicant and Siting Board.

2 Applicant and Project Description

2.1 Company Profile

Verona Solar LLC is an affiliate of Invenergy LLC (Invenergy). Invenergy is a utility-scale power producer developing, constructing, and operating renewable energy projects in the New York State energy market. Invenergy-owned energy projects operate under the supervision and regulatory authority of the New York State Public Service Commission (PSC) and the Federal Energy Regulatory Commission (FERC). Invenergy's management offices are in Chicago, Illinois. Invenergy's New York Regional Office is in Ithaca, NY.

Invenergy and its affiliates have developed over a hundred renewable energy projects in the United States, Canada, and Europe including the following New York solar and wind farms:

- Shoreham Solar Commons, 24.9 MW, Town of Brookhaven, Suffolk County, NY.
- High Sheldon Wind Farm, 75 turbines in the Town of Sheldon, Wyoming County, NY.
- Orangeville Wind Farm, 58 turbines in the Town of Orangeville, Wyoming County, NY.
- Marsh Hill Wind Farm, 10 turbines in the Town of Jasper, Steuben County, NY.

Invenergy also has developed and constructed 30 utility-scale solar projects in North America, totaling 3,300 MW installed to date, including one co-located at one of its wind farms.

Invenergy provides wholesale electricity to the public using clean, renewable sources such as wind and solar. This furthers the State of New York's renewable energy policy, which requires 70% of the State's energy to come from renewable sources such as solar by the year 2030.

Verona Solar intends to construct, own, operate, and maintain the Project.

2.2 Project Summary

Verona Solar plans for the Project to be capable of generating up to 250 megawatts (MW) from solar panels installed on leased private property in the Town of Verona and the City of Rome in Oneida County, NY. The project area for Verona Solar is shown in Figure 1.

Facility components will include solar panels and racking, access roads, inverters, buried and overhead electric collection lines, a substation to convert the generated electricity to the interconnection voltage (the Collection Substation), an operation and maintenance (O&M) building, and electrical interconnection facilities. The anticipated life of the project is approximately 35 years. Verona Solar anticipates the interconnection facilities will include a 345-kV switchyard built adjacent to National Grid's Edic-Clay 345-kV line (the POI Switchyard). The Collection Substation may be located adjacent to the solar panel area or may be co-located with the POI Switchyard. Further engineering is required to determine this. The location of the POI and tentative T-line route will be added to the publicly available project descriptions when determined, expected to be about Summer 2020. This summary is based on currently available information, which is still being gathered. During this pre-application period, Figures 1 and 2 will be updated based on feedback from stakeholders. All Stakeholders should be aware that the Project Description will change in a way that may elevate or change their status as a Stakeholder. Changes to the Figures and Project Description will be sent as part of the public outreach and communication process. All residents of the Study Area should understand that the Project Area boundary may change slightly as development of the Project progresses, but that until an Application is filed, these Figures are for feedback purposes only, not as definitive depictions of where solar equipment will or will not be located.

Invenergy is exploring various ways to co-locate agricultural uses of the land alongside the solar generation facility, such as harvesting forage for dairy feed, seeding with pollinator-friendly seed mixes and hosting beekeepers and hives on-site, and grazing sheep within the project area.

2.2.1 Energy Generation

Verona Solar estimates the Facility will generate approximately 503,700 megawatt hours (MWh) of energy per year. This will be enough electricity to meet the average annual consumption of approximately 70,000 households, based on average annual household electric consumption of 7.2 MWh for New York State, (EIA, 2014).

2.2.2 Economic Benefits

The Project would have positive socioeconomic impacts of permanent O&M jobs, temporary construction employment, lease payments to landowners, and a new source of revenue for schools, fire departments, county government, and town governments. National Renewable Energy Laboratory's (NREL) Jobs and Economic Development Impact (JEDI) model estimates. Project construction will create approximately 410 jobs with a payroll of \$30 million including contractors, machine operators, truck drivers, electricians, laborers, landscapers, and civil contractors. To operate and maintain the Facility, Verona Solar estimates it will hire approximately 2-5 full time operations and maintenance employees to be located at the site with other long-term part-time jobs for landscaping and/or vegetation maintenance. The construction jobs would last approximately a year and a half, and the operations and maintenance jobs would last for the life of the Project.

Verona Solar plans to enter into a PILOT agreement with the Oneida County Industrial Development Agency under which it would be required to make payments to the town, county, and school districts in

lieu of taxes. Amounts the Project would pay to different jurisdictions will depend on the final Facility layout and terms of the PILOT. Based on similar arrangements at other solar projects in New York, Verona Solar estimates a 250 MW project will generate approximately \$700,000-\$875,000 per year in taxes and tax-related payments.

Verona Solar also estimates the Project will pay approximately \$1.5 million per year to landowners leasing land to the Project.

2.3 Project Area and Study Area

Figure 2 shows the Project and Study Areas for the Verona Solar project, which Verona Solar defines as follows:

Project Area

The Project Area is the area where Verona Solar is evaluating the feasibility of installing solar panels, inverters, fencing, access roads, and other facility components. The Project Area may include areas that are ultimately not used for facility components due to wetlands, decisions on setback buffers, lack of landowner interest, or other factors. Verona Solar has selected an Project Area that it expects bounds the area that facilities will ultimately be proposed in the Application.

As shown in Figure 2, the Project Area includes parcels in the Town of Verona and City of Rome, NY. The Project Area is in Oneida County.

Study Area

Verona Solar has set the Study Area to include all properties in, and within 2 miles of the Project Area. As described below, property owners (residential and non-residential) in the Study Area will be sent direct mailings about Project milestones.

As shown in Figure 2, the Study Area additionally includes parcels in the Towns of Rome, Westmoreland, Vienna, and Vernon, in Oneida County, and the Town of Oneida and Lenox in Madison County.

A more in-depth description of the Study Area will be included in the PSS and Application, and it should be noted that the extent of the Study Area may be expanded for certain studies (e.g., visual impact assessment). The definition of the Study Area in Article 10 Regulations also allows for the area to be configured to address specific features or resource areas. Within the Article 10 Application, exhibits will be drafted to identify Project details and potential impacts. Each resource area analyzed may have a different study area based on the extent of those impacts. As an example, socioeconomics may be studied at the town or county level, whereas visual impacts would be identified based on the topography of the Facility Area and the surrounding areas. For the purposes of this PIP Plan, the Study Area has been defined conservatively based on a Facility Area that is anticipated to be larger than the ultimate footprint of the Facility in order to enhance stakeholder engagement. As the Article 10 process continues, specific Facility component locations will be identified and shared with the general public, stakeholders,

and all affected agencies. It is presumed that any potential alternatives will be located within the communities identified herein.

3 Public Involvement Program

3.1 PIP Goals

Verona Solar will implement this PIP throughout the Project planning, pre-application, certification, compliance, and implementation phases to accomplish the following goals:

1. Inform people, agencies, and organizations of the Project, development plans, development milestones, the Article 10 review process, and the avenues by which they can remain informed.
2. Identify Project Stakeholders who have an interest in the Project.
3. Engage Stakeholders to understand their Project interests and concerns, if any.
4. Objectively consider and incorporate feedback from Stakeholders.

3.2 PIP Schedule

Appendix B lists planned and started PIP activities. Verona Solar began conducting PIP activities in May 2019, and it will continue for the life of the Project through decommissioning.

3.3 Public Notification and Involvement

3.3.1 Notifications

Project notifications will contain, at minimum, the following:

1. The Project name
2. The Project website
3. Contact information for one of the Project Representatives including phone and email
4. Location of document repositories

Verona Solar will notify stakeholders of the following important project milestones:

- PIP Submittal
- Open Houses
- PSS Submittal
- Application Submittal
- Public Hearing(s)
- Siting Board Decision
- Commencement of Construction
- COD

3.3.2 Collection of Public Input

Verona Solar will reach out to Stakeholders to introduce the Project and solicit feedback. The Project website (www.veronasolarenergy.com) will act as a platform to collect feedback. Project representatives listed in Section 3.5.1 will take comment, feedback, and input on the Project throughout its development via email and phone. Events hosted or tabled by Verona Solar will provide opportunity for public input as well.

3.3.3 Distribution of PSS and Application Documents to Stakeholders

Verona Solar will notify Stakeholders when the PSS and application are available on the Project website and at various Document Repositories, including additional notification when the PSS and application materials are updated. Verona Solar does not intend to provide individual hard copies of these documents to Stakeholders except as required by 16 NYCRR §1000.5 and 16 NYCRR §1000.6.

3.3.4 DPS Document and Matter Management (DMM) System

Information about Verona Solar related to Article 10 will be found on the DPS Document and Matter Management (DMM) system

<http://documents.dps.ny.gov/public/MatterManagement/CaseMaster.aspx?MatterSeq=61487&MNO=19-F-0777>.

3.4 Stakeholders

Appendix E lists potential Stakeholders that Verona Solar has identified for the Project. Verona Solar will update this list over the lifetime of the project.

Upon request, Verona Solar will add people outside the Study Area to the Stakeholder list. Such requests could be made by calling, emailing, or meeting with a Project representative listed in Section 3.5.1; submitting a request online via the project website (www.veronasolarenergy.com); by request at events hosted by Invenergy Solar; or by submitting a request via US Mail to Invenergy at 123 S. Cayuga St., Suite 201, Ithaca NY 14850.

3.5 Outreach Tools

3.5.1 Project Representatives

Project Representatives are available to answer questions and assist those interested in being added to the Stakeholder list.

P: (607) 330-0399

3.5.2 New York Office

Invenergy maintains a permanent office in Ithaca, New York, at address 123 South Cayuga Street, Suite 201, Ithaca NY 14850 for developers working on New York projects, including Verona Solar. Project representatives for Verona Solar are based in the New York Regional Office and mail to them should be addressed to the address above. The office maintains regular business hours, 9am-5pm, Monday through Friday.

3.5.3 Project Website

Verona Solar will establish a user-friendly website dedicated to the Project that is written in plain English. Verona Solar will update the website as the Project develops and more information becomes available. When available, the following items will be posted on the website:

- www.veronasolarenergy.com
- Project description and location;
- Project benefits and need;
- Project layout maps;
- Project milestones and timeline
- Project Representative contact information, including an email address and a telephone number;
- Summary of the Article 10 process;
- Summary of the intervenor funding process with instructions on how to apply;
- Addresses of local document repositories;
- Links to the Article 10 siting board webpage and to case-specific documents file for the Project;
- Notices for public outreach events, filings, and public hearings;
- PIP tracking report,
- Publications and other information related to the Project;
- Instructions on how to be added to the stakeholder list.
- Complaint procedures

3.5.4 Document Repositories

Verona Solar will maintain hard copies of the PIP, the PSS, and the application, plus any additional outreach or informational materials, at the document repositories listed in Appendix C.

3.5.5 Mailings

3.5.6 Verona Solar will mail notices to organizations, agencies and individuals on the stakeholder list. This list includes landowners, businesses, and residents within the Outreach Area, as well as the stakeholder identified in Exhibit E and interested parties who have requested to be added to the stakeholder list (see Section 3.4).Newspaper Ads

To notify residents that maybe outside the Study Area or otherwise not on the stakeholder list, Verona Solar will place newspaper ads for important project milestones. The newspapers in which Verona Solar plans to place ads are listed in Appendix D.

3.6 Outreach Activities

3.6.1 Stakeholder Consultations

Project representatives will be available for consultations with stakeholders. Consultations may be in-person meetings or phone or video calls. As appropriate, Verona Solar will conduct subsequent meetings to answer specific questions, and to discuss studies, mitigation, or other strategies that could address stakeholder concerns.

3.6.2 Town Board, Common Council, and County Board Meetings

Invenergy Solar's Project Representatives will frequently attend regularly scheduled board and council meetings of the Project's host communities, and it may offer to attend town board meetings of other municipalities in the Study Area. Verona Solar will request to attend the one of the regularly scheduled meetings of the legislature or board of the host county. Project representatives may request to present at the above meetings or may present at the request of those hosting them.

Attendance of town and county board and council meetings will be documented in the PIP tracking report.

3.6.3 Open Houses

Verona Solar will hold two open houses prior around the time that the PSS is submitted, and again around the time of Application submittal. These events will be held in the Project Area or the Study Area, provided a suitable venue is available in these areas. The meetings will feature outreach materials described in the following section. The open houses will be held at different times of day to accommodate a variety of schedules.

A Verona Solar representative will greet those in attendance and explain the resources present at the event and then ample time will be allowed for review of the displayed materials and one-on-one discussions with Verona Solar representatives.

A mailing to the entire Study Area will be sent out at least two weeks prior to any Open Houses to provide public enough time to plan to attend. A variety of outreach materials (see Section 3.7) may be used to promote and provide information at the Open Houses but, at a minimum, information will be posted at the document repositories.

3.7 Outreach Materials

Verona Solar outreach materials may cover a wide range of topics and may use a variety of materials. These topics and materials include:

Topics

- Invenergy
- The Project, including:
 - Location & Maps
 - Timeline
 - Studies
 - Viewshed
 - Economic impacts,
 - Environmental impacts,

Materials

- Handouts/Fliers
- Posters
- Photos
- Videos
- Presentation
- Newspaper Ads

- Community impacts
- Decommissioning
- Article 10 Application process
- Becoming a stakeholder
- Solar panel information/engineering
- Intervenor funding
- How to contact Project Representatives and/or learn more about the Project

3.8 PIP Tracking Report

Verona Solar will maintain a log documenting outreach activities including meetings, mailings, newspaper postings, newsletters, events, etc.

For each event, the log will document the event date, location, attendees, summary of topics discussed, summary of comments received, and any follow-up steps.

Approximately every three months, Verona Solar will file the PIP tracking report with the Secretary to the Siting Board and post it on the Project website. Stakeholder mailings will be documented with affidavits filed with DPS.

4 Environmental Justice Areas

Figure 1 maps the Project Area and the nearest Potential Environmental Justice Areas (PEJA). To identify locations of potential environmental justice communities, Verona Solar used the NYSDEC digital tool called GIS Tools for Environmental Justice. This tool identifies areas where significant portions of the population are at or below the federal poverty level. Using census block groups from the 2000 census, the PEJA tool identifies areas that meet one or more of the following thresholds:

- 51.1% or more of the population in an urban area reported themselves to be members of minority groups; or
- 33.8% or more of the population in a rural area reported themselves to be members of minority groups; or
- 23.59% or more of the population in an urban or rural area had household incomes below the federal poverty level.

There are no PEJA in the Project Area, but the following is in the Study Area:

- Census Block Group ID 360650228001 is located approximately 0.5 miles from the Project Area in Oneida County between Rome and Verona. The area is partially rural and partially in the more populated area of Rome.

As no Project components are planned in the PEJA, no impacts are anticipated to the above PEJA. Verona Solar will nevertheless assess whether disproportionate impacts to the PEJA are expected in the Article 10 Application.

5 Language Access

Article 10 regulations require the PIP to identify any language other than English spoken by 5,000 or more persons, according to United States Census data, residing in any 5-digit zip code postal zone in which any portion of such zone is located within the Study Area.

The table below shows the primary language spoken at home by zip code, according to the U.S. Census Bureau, 2013-2017 American Community Survey 5-Year Estimates.

| | Zip Code | English | Non-English | Spanish | Other | Zip Code |
|-----------------|----------|---------|-------------|---------|-------|----------|
| A. Durhamville | 13054 | 1,530 | 1,530 | - | - | 13054 |
| B. Rome | 13440 | 39,250 | 36,860 | 1,274 | 1,116 | 13440 |
| C. Verona | 13478 | 2,890 | 2,796 | 64 | 30 | 13478 |
| D. Oneida | 13421 | 12,796 | 12,232 | 170 | 394 | 13421 |
| E. Canastota | 13032 | 11,413 | 11,114 | 61 | 238 | 13032 |

6.2 Appendix B – Project Schedule

| Activity | Goals | Schedule |
|--------------------------------------|---|--------------------------|
| Project Website | Share basic information, notify viewers of upcoming events, act as a repository for Article 10 documents | January 2020 |
| Stakeholder Meetings | Share basic information, collect feedback | Ongoing |
| Town Supervisor Meeting(s) | Share basic information, collect feedback | June 2019 |
| Town Board Meetings | Share basic information, provide updates on the Project and its Article 10 application progress, collect feedback | Through COD |
| County Legislature or Board Meetings | Share basic information, collect feedback. | Prior to COD |
| Milestone Mailings | Notify stakeholders of the upcoming Project milestone | Prior to Each Milestone |
| Newspaper Publication | Notify nearby residents of the upcoming Project milestone | With Each Milestone |
| Open House Mailings | Notify stakeholders of the upcoming Open House(s) | Prior to Each Open House |
| Open House(s) | Introduce the Project, collect feedback, update the stakeholder list, share outreach materials | April 2020 |
| PSS Filing | File the PSS | July 2020 |
| Open House(s) | Introduce the Project, collect feedback, update the stakeholder list, share outreach materials | August 2020 |
| File Application | File Application | November 2020 |

Note: Basic information includes an overview of the Project, Invenergy, and the Article 10 review process, including instructions on how to obtain intervenor funding, to join the stakeholder list, and to submit comments.

6.3 Appendix C – Document Repositories

| Location | Address | Contact |
